Re: Conservation Chemical Company
of Illinois, Inc. Site, Gary, Indiana

Dear Ms. Beasley:

This will respond to your letter of October 31, 1994 addressed to "Chemline, N.J., Inc. (for Chemline Corp.)". Please note that Chemline Corp. is now known as Portfolio One, Inc. and can be contacted at the above address. Chemline, N.J., Inc. is not a successor to Chemline Corp. and is not the proper recipient of your request.

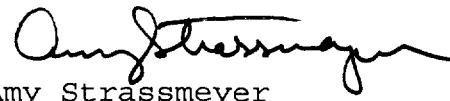

We received a request for information regarding this site several years ago. Based on our response that Chemline Corp. sold non-hazardous lime products to Conservation Chemical, it was my understanding that Chemline Corp. would not be deemed responsible for clean-up costs at the site.

Enclosed are materials in connection with our earlier response, which may be helpful. I do not have the complete file and would have to contact our outside counsel at the time if you need additional information.

Our position in this matter is that Chemline Corp. was not a generator or transporter of waste to the site, and we therefor cannot agree to perform or finance response activities.

Sincerely,

PORTFOLIO ONE, INC.

Amy Strassmeyer

Re: Conservation Chemical Company of Illinois, et al.
Environmental Protection Agency Region V
Administrative Order under Section 106 of CERCLA

Dear Mr. Costanza:

We are responding on behalf of our client, Chemlime Corp., to your letter of August 15, 1988, regarding the Conservation Chemical Company Superfund site in Gary, Indiana.

When our client was first advised of its possible involvement in this matter, we requested a copy of the relevant pages from EPA's May 2, 1986 Case Preparation Assistance Report relating to incoming waste transactions at the Superfund site. Those pages were forwarded to us by letter dated April 1, 1987. In reviewing that information, we note that all incoming transactions involving Chemlime Corp. were purchases by Conservation Chemical Company of lime, lime slurry or lime liquid. There is no indication in the documents provided to us that any substance generated by Chemlime Corp. was transported or delivered to the Superfund site for treatment or disposal. To the contrary, the lime products were used as a raw material in Conservation Chemical's process.

We call your attention to the opinion in Edward Hines Lumber Co. v. Vulcan Materials Co., 27 ERC 1904 (N.D. Ill. 1988), in which the court held that the mere sale of a hazardous substance to the operator of a facility that becomes a Superfund site does not constitute arranging for the disposal or treatment of a hazardous substance. Consequently, a party in the position of Chemlime in this case is not a potentially responsible party subject to a cost recovery claim or a claim for contribution by other PRP's. Therefore, Chemlime Corp. respectfully rejects the claim of the 6500 Industrial Highway Committee that it is liable

AFFIDAVIT OF JAMES J. FITZPATRICK

State of New Jersey)
) SS:
County of Union)

James J. Fitzpatrick personally appeared before me, the undersigned notary public, and after being duly sworn, deposed and said that:

1. During the years 1973 through 1977, he was the President of the Chemlime Corporation, which was located at 10 Cherry Street, Elizabeth, New Jersey.

2. Chemlime was a distributor of "Chemlime Slurry." Chemlime Slurry was a liquid lime product used as a neutralizing agent in the steel and chemical industries, and in municipal sewage treatment plants. It was sold widely throughout the United States by Chemlime and its competitors. A chemical analysis of Chemlime Slurry is attached hereto as Exhibit 1.

3. Chemlime Slurry was produced from a lime material created as a by-product of the generation of acetylene gas. Chemlime purchased the lime material from acetylene producers for resale in the form of Chemlime Slurry to Chemlime's customers.

4. He has reviewed the data, attached hereto as Exhibit 2, for transactions involving the sale of Chemlime Slurry by Chemlime to Conservation Chemical that occurred during the May 7, 1973 through June 21, 1977 period.

5. Chemlime sold all of its Chemlime Slurry on an as-delivered basis only. In 1973, Conservation Chemical paid Chemlime approximately \$50.00 per dry ton of Chemlime Slurry

6. Chemlime never disposed of Chemlime Slurry.
7. Chemlime Slurry is not presently, and has never been, designated or defined as constituting a "hazardous waste" under the Resource Conservation and Recovery Act or any other environmental statute or regulation.

CHEMLIME

An Economical High-Calcium Hydrated Lime

CHEMLIME is an economical hydrated lime, delivered by tankwagon as a slurry direct to the user. Its advantages are:

- Initial low cost
- Convenience of handling
- Bulk movement without large capital expenditure

CHEMLIME results from the generation of acetylene. It is produced locally in most major cities and is a quality hydrated lime. For almost twenty years, Chemlime Corp. has been processing and selling this material, which previously had been in demand but not available because of handling problems. We are now able to deliver CHEMLIME in most areas.

CHEMLIME is used in many chemical industries. Suggested applications are: general acid and waste neutralization, including neutralization of pickle liquors; water treatment; lime bleach and recausticization in the paper industry; road stabilization; tanneries; neutralization of acid soils; neutralization of liquid effluent from gas stream scrubbers.

CHEMLIME compares chemically with regular high-calcium limes. A typical analysis and particle size table are listed below:

<u>Typical Chemical Analysis</u>		<u>Screen Size Distribution</u>
Ca(OH) ₂ --- % by weight	min. 90.0 %	Thru # 6 Sieve 99.9%
CaO equivalent "	min. 72	Thru # 30 Sieve 97.
CaCO ₃ --- " "	max. 7.0	
R ₂ O ₃ (Fe ₂ O ₃ & Al ₂ O ₃) "	max. 1.15	
MgO	max. .75	
Insolubles	max. 1.1	

Because of the production process, CHEMLIME is an economical product. It is sold on a delivered, dry solids basis, in tankwagons of approximately 4,500 gallon capacity at 35% solids content, or 8 tons dry. The exact amount delivered is determined by weighing the calibrated tankwagon, calculating the specific gravity, and deriving the exact % of solids from a lime conversion table.

With trucking an important part of the costs, it is necessary to know the distance from source in order to quote a delivered price. We shall be pleased to quote you upon request.

The only equipment required for use of CHEMLIME is an agitated storage tank and pump to transfer the slurry from our tankwagon into said tank. Since lime must be made into a slurry before it is used, many plants already have a tank satisfactory for this purpose. If you are currently using lime or plan to use it in the near future, we should appreciate the opportunity to discuss CHEMLIME with you.
